OBJECTIVE

To obtain a position doing web and mobile app development within an exciting and interesting company. I prefer to telecommute the majority of the time and have limited availability onsite.

SKILLS

<u>Languages</u>	<u>Operating Systems</u>	<u>Other</u>
XHTML	Mac OSX	Amazon AWS Cloud
CSS	iOS, Android	Google Analytics/Adwords
Javascript/AJAX/jQuery	Windows	Photoshop
PHP	Linux (Cent OS/Fedora)	Illustrator
MySQL		InDesign
Java		Flash
Shell Scripting		Final Cut Pro
C		After Effects
Objective C		Asterisk/Trixbox
Swift		React Native
		Node JS

EXPERIENCE

2017 – Present **Mobile App Developer**, Fotobomb, San Bernardino, CA

- Social media app development using React Native
- Advanced UI development with ES6 and Flexbox
- Serverless platform using Node.js executed on AWS Lambda
- REST API deployed on AWS API Gateway tested using Postman
- CDN content delivery on AWS S3 using Cloudfront
- Native JAVA customizations and deployed .apk using Android Studio
- Native Swift customizations and deployed to Apple Test Flight using Xcode and iTunes Connect
- Administered Beta release and feedback collection from tester community

- 2005 – 2017 **Web Developer and IT Administrator**, Publishing Resources LLC, Houston, TX
(onsite and telecommute)
- Development of web-based business software integrating Customer Relationship Management (CRM) and Content Management Systems (CMS) facilitating expansion into new markets.
 - Custom email archival solution using postfix with integration to CRM.
 - Design and maintenance of database driven company websites.
 - Collaboration with Art Department in website designs and management and storage of company digital assets (DAM).
 - Setup and administration of Local Area Network, Asterisk PBX VoIP phone system, production Linux web servers and client computers in a medium sized corporate office.
 - Experience researching and communicating effectively with industry vendors and management for IT budgeting.
 - Increasing web based traffic and conversions through organic and paid Search Engine Optimization.
 - Development of email based marketing and customer contact software.
 - E-commerce development including experience with multiple merchant gateways and open source shopping carts.
 - Coordination of intern developer program including interviews and evaluation.
 - Responsive web design allowing website adaptation to tablets and mobile devices
 - Overall, transitioning a predominantly print based publishing company to leverage the tools of the internet and establish a presence online.

2003 – 2006 **Freelance Videography and Multimedia**, Atlanta, GA
(samples available upon request)

- Website design including use of Flash and Actionscript.
- Video cinematography and production.
- Video Editing, motion graphics and DVD authoring.

2003 – 2004 **Computer Repair Technician**, CompUSA, Atlanta, GA

EDUCATION

2001 – 2003 **Indiana University**, Bloomington, Indiana
Unfinished B.A. in Computer Science
